

BRITAIN
CALLS THE WORLD

Men, women, and even children, seek enlightenment and death in hear broadcasts from London. They are the inhabitants of the occupied countries of Europe. They do so because they have learned that the British broadcasts tell them the truth.

All over the world, and in many languages, you can listen to the truth from London. The British radio speaks to the face—giving the latest, most authentic news as soon as it is known.

In addition to news, the BBC brings you every night in world-famous "Radio Newsweek". It brings you talks from leaders of the Allies, music from people in every walk of life, from war workers, from men in the lines at Home and Overseas, and programmes of music and entertainment.

Full details of all the programmes in English are broadcast from London in *Many Every Sunday*, and are made available in the *Paris*, almost everywhere, it used to advance. If you cannot find them in your own paper, enquire for them. Many items are re-broadcast, too, by stations all over the world. The wavelengths and times of broadcasts from Britain, in all other languages, are available from your local British authorities or your own radio stations.

FROM LONDON COMES THE VOICE OF BRITAIN . . . THE VOICE OF FREEDOM

BEHIND THE URALS by JOHN SCOTT

JOHN SCOTT
BEHIND THE URALS

John Scott, a young American engineer, spent six years in Magnitogorsk while it grew from a small settlement of huts and shacks to a flourishing modern town of nearly a quarter of a million inhabitants. His story of the growth of a city and of a great industrial centre is one of the most fascinating ever told.

MAGNITOGORSK, in the Urals, is today a great centre of steel production, one of the mighty hubs of Soviet resistance to the Germans. It was built as part of the first FIVE YEAR PLAN. Scott's moving and objective study of it brings home, as clearly as it can be done, the cost to the Russian people in "blood, toil, tears and sweat" of their tremendous achievement. For the Russians it was worthwhile, a thousand times over, though it was a task which would have strained the patience and courage of most Western peoples beyond the breaking-point.

Here then is a picture of six years in the life of Magnitogorsk, with its blast furnaces, rolling mills, herculean plants, and the cost of new Russia accomplished in ten years what other nations took two generations to carry through: of factories, Jews, Muslims, co-operating with Russians in a supernatural task, paying in a few months from present literacy to competent engineering capacity; of the work of building houses and flats, factories and public buildings, in an orderly social structure; of how the people affected Magnitogorsk, and what it is like to live in a Russian town.

As a contribution to Anglo-Russian understanding, as an explanation of the secret of Russian strength and tenacity in resistance to aggression, *Behind the Urals* is unique.
